Marsden DT-I-100: Cut the time it takes to weigh palletised goods

Weighing palletised goods is easier than ever with Marsden's range of drive-thru platform scales. If you use pallet trucks, you can **weigh pallets, crates and dolavs quickly and easily** with the **affordable, easy to use** DT-I-100 and Trade Approved DT-I-100-APP.

Speed up weighing processes when you're using pallet trucks

Our drive thru scales are designed to speed up weighing processes, as goods can be easily rolled onto them using a pallet truck. The platform and ramps are **low profile** to make placing a load on the scale as easy as possible. Our drive thru scales are suitable for almost any size of load, **upto a maximum of 1.5 tonnes**. The drive thru has a tough **anti-slip durbar surface**, and it's built to last years.

Simple features can improve your processes

A **bright, clear 25mm LCD screen** on the I-100 indicator means weight readings appear clearly as soon as a weight is placed on the scale.

Use **Tare** to remove the weight of an item such as a pallet, for an accurate reading of the goods on the scale. **Accumulation** means you can add up multiple weights and get a total - ideal for shipments where the total weight of goods loaded onto the vehicle is needed.

Standard or Trade Approved?

For checkweighing and internal recording processes, the standard, non approved DT-I-100 is perfect.

However, where the price of your goods is based on weight, your scale will need to be **Trade Approved**.

The DT-I-100-APP is the Trade Approved option.

Key features

- Mild steel low profile drive thru platform
- Built-in ramps - 45mm incline
- Bright 25mm LCD display
- Choice of capacities, graduations and sizes
- Zero
- Tare/Preset Tare
- Accumulation
- Rechargeable battery

Reliable weighing, year after year

For extra peace of mind, **Marsden service contracts** are available. Recalibration can be carried out, and a **Calibration Certificate** supplied. Calibration Certificates may be checked during Health & Safety or Trading Standards checks.

Specification

Capacities: 600kg/1500kg

Graduations: 0.2kg/0.5kg

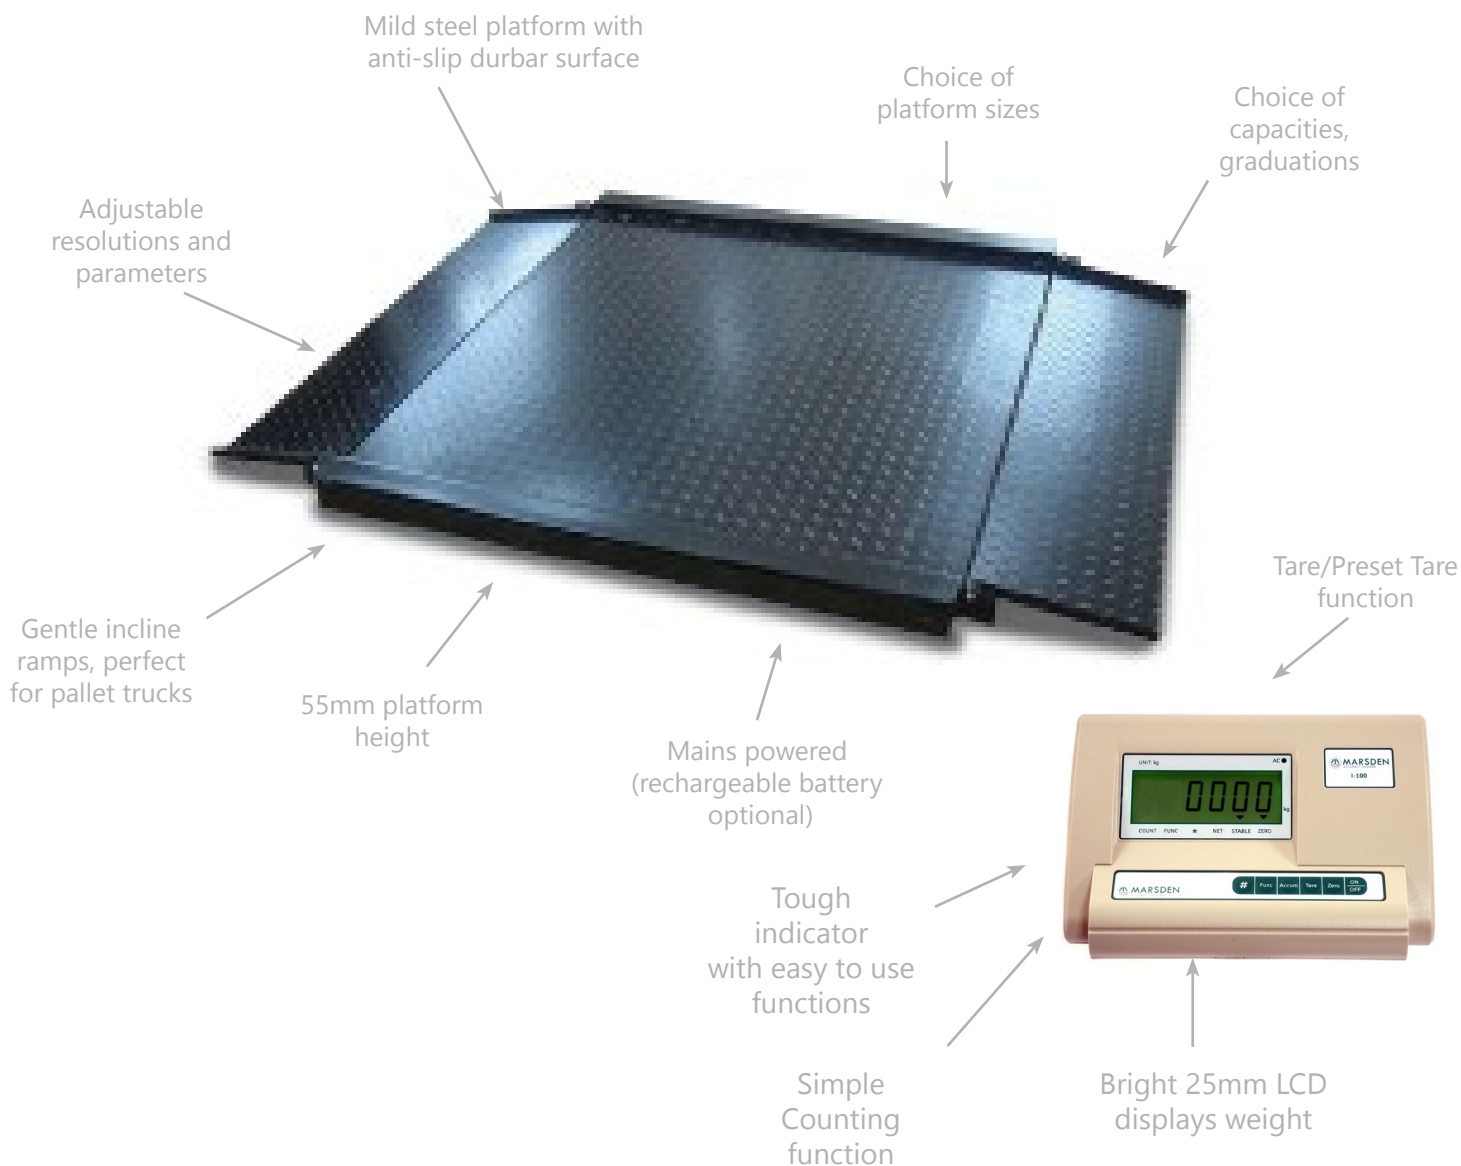

Dimensions: 1200mm x 1200mm x 55mm;
1500mm x 1500mm x 55mm

Power: Mains adaptor or rechargeable battery
